Wave Motion 26 (1997) 401–402

WAVE MOTION

Contents of Volume 26

Vol. 26, No. 1

C. Vemula and A.N. Norris
Flexural wave propagation and scattering on thin plates using Mindlin theory 1
R. Burridge
An apodized spherical transducer: Analytical solution 13
T. Werckman
A note on an extra constraint found in some multidimensional extensions of integrable equations 25
B. Ursin and M. Tygel
Reciprocal volume and surface scattering integrals for anisotropic elastic media 31
I. Åberg and A. Karlsson
"The source problem" – Transient waves propagating from internal sources in non-stationary media 43
B. Chen and D. Gross
Interaction of two coplanar penny-shaped cracks with transient elastic waves 69
Y.S. He, Z.K. Xie and Q.Y. Ye
Radiation and scattering of sound waves by a screened prolate spheroid 85
M. Ben-Amoz
Comments on a paper by J.R. Willis 97
Erratum to "The two-velocity dynamical system: boundary control of waves and inverse problems"
by M. Belishev, A. Blagovestchenskii and S. Ivanov [Wave Motion 25 (1997) 83–107] 99

Vol. 26, No. 2

T.B. Hansen and A.N. Norris
Exact complex source representations of transient radiation 101
M.C. Shen and N.S. Yeh
Exact solution for forced capillary-gravity waves in a circular basin under Hocking's edge condition 117
L. Fishman, A.K. Gautesen and Z. Sun
Uniform high-frequency approximations of the square root Helmholtz operator symbol 127
T. Yasuda and N. Mori
Roles of sideband instability and mode coupling in forming a water-wave chaos 163
P.W. Buchen and R. Ben-Hador
Perturbation formulas for linear dispersive waves in weak spatially non-uniform media 187
D. Nkemzi
A new formula for the velocity of Rayleigh waves 199

Vol. 26, No. 3

T.C.T. Ting and D.M. Barnett
Classifications of surface waves in anisotropic elastic materials 207
C. Yan
Something hidden in the Fourier series and its partial sum: Solitary wave solutions
to polynomial nonlinear differential equations 219

(*Continued overleaf*)

B. Tan and J.P. Boyd
Dynamics of the Flierl–Petviashvili monopoles in a barotropic model with topographic forcing 239
R. Grimshaw, E. Pelinovsky and A. Bezen
Hysteresis phenomena in the interaction of a damped solitary wave with an external force 253
V.A. Borovikov
On the large-time asymptotics of Green's function for internal gravity waves 275
V.A. Borovikov
The far field of the moving and oscillating source: The resonance case 291

Vol. 26, No. 4

R.G. Payton
Two-dimensional elastic wave front shape caused by a circular source in transversely isotropic media 307
R. Vedantham and J. Hunter
Sound wave propagation through incompressible flows 319
P.P. Delsanto, R.S. Schechter and R.B. Mignogna
Connection machine simulation of ultrasonic wave propagation in materials III: The three-dimensional case 329
X. Wang, H. Zhang and C. Ying
Acoustic field in a borehole within fluid formations with a horizontal interface 341
G.K. Forster and A.D.D. Craik
Second-harmonic resonance with Faraday excitation 361
V.M. Babich and V.V. Lukyanov
Propagation of waves in a piezoelectric layer with a weak horizontal nonhomogeneity 379
